Built for Real Operations

Smart security starts with the best Visitor Management Platform by Nirikhon, replacing old paper logbooks with quick, automatic digital tracking. Super fast checks help your front desk screen guests instantly, keeping your corporate offices and buildings 100% safe.

CAPABILITIES

Key Features & Product Modules

Heavy Duty Stainless Steel Chassis

The strong rust-proof outer body. It protects internal parts from dust and damage, giving a premium long-lasting look.

Brushless Motor Drive

The silent core engine that moves the gate arms. Ensures ultra-smooth, noise-free rotation and works for years without any maintenance.

Industrial Control Microboard

The smart central brain of the gate. Processes scan data instantly and runs 24/7 without crashing, even during power updates.

QR & Biometric Scan Hub

The top scratch-resistant glass scanning area. Reads mobile QR codes or RFID cards in less than 0.2 seconds to keep entry lines moving fast.

Infrared Motion Sensors

Invisible safety sensors inside the passage. Prevents the gate from closing on a person mid-way and stops unauthorized double entry (anti-tailgating).

LED Status Indicator Rings

Bright directional guide lights on top. Changes color (Green/Red) to show visitors exactly when it is safe to walk through.

Universal Network Module

The built-in internet and LAN connector. Keeps the hardware connected to your visitor software in real-time for easy remote monitoring.

Fail-Safe Emergency Brake

The automatic safety release system. The gate arms drop down automatically during a fire alarm or power cut for safe and quick evacuation.

Where This Product Fits

**Factory and Construction Site
Turnstile Gate**

**Smart Turnstile Gate at Hotel
Reception**

**Airport Passenger Verification
Turnstile Gate**

**University Campus Turnstile Access
System**

**Corporate Office Turnstile Gate
Access**

OPERATIONAL VALUE

Software, Benefits & Outcomes

Centralized Control Dashboard

This is the main system screen that lets you monitor and control all connected turnstile gates from one single place.

- See exactly who is entering and leaving your building in real-time.
- Open or lock any gate instantly with a single click from your computer or phone.
- Get immediate warning notifications if someone tries to pass without scanning.

Automated Analytics & Reporting

This feature automatically saves all entry data and generates smart reports for your business safety and management.

- Export daily, weekly, or monthly visitor and staff logs into Excel or PDF sheets.
- See graphs of your busiest office hours to manage reception staff better.
- Keep a live digital list of everyone inside the building for safety during emergencies.

Smart Identity & Access Management

This part handles how visitors, employees, and contractors get permission to pass through the gates.

- Automatically sends secure QR codes to visitors via WhatsApp or SMS for quick scanning.
- Easily set specific entry times for employees, guests, or delivery staff.
- Instantly block unwanted people or expired IDs from opening the gate.

Case Studies & Client Feedback

"We replaced four separate tools with this platform. The leave approval workflow alone saved 15 hours per month for our HR team."

HR Director, Multinational FMCG Group

3,500 employees, 12 countries

RESOURCES

Media & Questions

Q. How does this system protect visitor privacy?

A. All data is encrypted and stored in a secure cloud. You can also set the system to automatically delete visitor data after a certain period to follow privacy laws.

Q. Does the system notify the staff when a guest arrives?

A. Absolutely. The system sends an instant SMS or email to the host as soon as the visitor checks in at the front desk.

Q. Can visitors register before they arrive?

A. Yes! The pre-registration feature allows hosts to send a QR code to guests in advance. When they arrive, they just scan the code and enter.

Q. Can it be integrated with my existing security gates?

A. Yes, our platform is designed to connect with RFID readers, turnstiles, and electronic door locks to provide seamless access.
